Strategic Procurement and Sourcing

Ref: 1501_3777 **Date:** 28 March – 1 April 2027 **Location:** Doha **Fees:** 4300 GBP

Strategic Procurement and Sourcing is a five-day senior procurement course delivered by Mars Training Centre at our international venues — including London, Dubai, Amsterdam, Geneva, and Kuala Lumpur — designed for procurement directors, heads of sourcing, and category leaders responsible for high-value spend.

Procurement has moved a long way from the purchase-order function it once was. Boards now look to procurement to manage tens or hundreds of millions of pounds of spend, secure supply through geopolitical disruption, deliver year-on-year savings without damaging supplier relationships, and embed sustainability and risk management into every category. That requires a strategic operating model, not a transactional one, and it requires senior procurement leaders who can think and act at executive level.

Across five focused days, you will move from a spend-mapping diagnostic into the disciplines that separate strategic procurement from operational buying — category strategy, sourcing strategy selection, total cost of ownership, supplier segmentation, and the build-versus-buy decision. The week is delivered by senior practitioners who have led procurement organisations in industry. You leave with a personal action plan grounded in your own categories and spend profile.

What You Will Learn

By the end of this programme, you will be able to:

- Map your organisation's spend and segment it for strategic treatment.
- Design a category strategy that aligns with corporate objectives.
- Select the right sourcing strategy for each category profile.
- Build a total-cost-of-ownership model that goes beyond unit price.
- Apply supplier segmentation to focus relationship investment.
- Construct a make-versus-buy analysis for a critical category.
- Embed sustainability, risk, and innovation criteria into sourcing decisions.
- Build the business case for a strategic procurement transformation.
- Lead a category review with cross-functional stakeholders.
- Translate procurement results into board-level language.

How You Will Benefit

You will leave with a structured framework for moving your function from operational to strategic, the analytical tools to make category and sourcing decisions defensibly, and a Mars Certificate of Completion.

Your organisation will gain a procurement leader who can articulate strategy at the executive table, deliver category outcomes that go beyond price reduction, and bring discipline to high-value sourcing decisions.

Who This Programme Is For

This programme is designed for senior procurement professionals, including:

- Chief Procurement Officers and Procurement Directors
- Heads of Sourcing and Heads of Category
- Category Managers responsible for high-value spend
- Supply chain directors with procurement accountability
- Senior commercial managers in capital-intensive industries
- Finance directors with procurement oversight
- Senior public-sector procurement leaders
- Procurement transformation programme directors

The seniority floor is senior manager and above.
