ESG and Sustainability Reporting

Ref: 1810_6249 **Date:** 4 – 8 October 2027 **Location:** Tokyo **Fees:** 6900 GBP

ESG and Sustainability Reporting is a five-day senior sustainability-reporting course delivered by Mars Training Centre in London, Amsterdam, Dubai, Milan and Cape Town — designed for chief sustainability officers, heads of ESG, senior finance leaders and reporting practitioners responsible for building disclosures that satisfy investors, regulators and the public.

Sustainability disclosure is no longer voluntary. The International Sustainability Standards Board ISSB has issued IFRS S1 and IFRS S2 as the global baseline. The European Sustainability Reporting Standards apply to companies operating in the European Union. The Task Force on Climate-related Financial Disclosures TCFD recommendations have been absorbed into many national reporting regimes. The Global Reporting Initiative GRI remains the most widely used standard for impact disclosure. Investors are pricing climate, social and governance risk into the cost of capital — and stakeholders now scrutinise sustainability claims more closely than financial ones.

This programme equips senior reporting practitioners with a working command of the major ESG and sustainability frameworks, the data and assurance disciplines that underpin credible disclosure, and the governance that boards now expect. It is delivered by senior practitioners drawn from the Mars panel.

What You Will Learn

By the end of this programme, you will be able to:

- Apply the ISSB IFRS S1 and S2 standards, ESRS, TCFD and GRI frameworks to your reporting context.
- Conduct a double-materiality assessment that satisfies modern reporting standards.
- Design the data architecture and controls required for credible ESG disclosure.
- Build climate-related risk disclosures using scenario analysis.
- Lead Scope 1, 2 and 3 greenhouse-gas reporting and target setting.
- Prepare for sustainability assurance — limited and reasonable.
- Communicate ESG performance to investors, regulators and stakeholders.
- Embed ESG governance and accountability at board level.

How You Will Benefit

You will leave with a senior practitioner's command of ESG and sustainability reporting and a personal plan to strengthen your organisation's disclosures, along with a Mars Certificate of Completion.

Your organisation will gain a reporting leader who can produce disclosures that investors trust, withstand assurance, and connect sustainability performance to enterprise value.

Who This Programme Is For

This programme is designed for senior leaders responsible for sustainability and ESG reporting, including:

- Chief sustainability officers and heads of ESG
- Heads of corporate reporting and group financial controllers
- Chief financial officers and finance directors
- Heads of investor relations
- Heads of risk overseeing climate and ESG risk
- Internal audit leaders with sustainability assurance remit
- Public-sector and not-for-profit sustainability leads
- Senior managers preparing for chief sustainability officer roles

The seniority floor is senior manager and above in sustainability, finance, risk or reporting. The week balances framework teaching with applied disclosure drafting and a personal action plan built across the five days.
